

Making the school canteen a *VeriCool* place to eat

CASHLESS
CATERING

Finally, a low cost, low maintenance Fingertip Cashless Catering System is available for your school with the key aim of making lunch time more efficient and exciting for your students and staff alike.

It is simple to use, engages the students and offers your school cost savings coupled with the latest technology ensuring that your canteen becomes a *VeriCool* place to eat!

So, what does *VeriCool* cashless catering offer?

- **Unique fingertip verification for every student.**

No carrying cash into the canteen, no need for expensive swipe cards. With a verification speed of less than 1 second it couldn't be simpler. Students place their enrolled finger on the fingertip scanner to confirm their identity and make a payment.

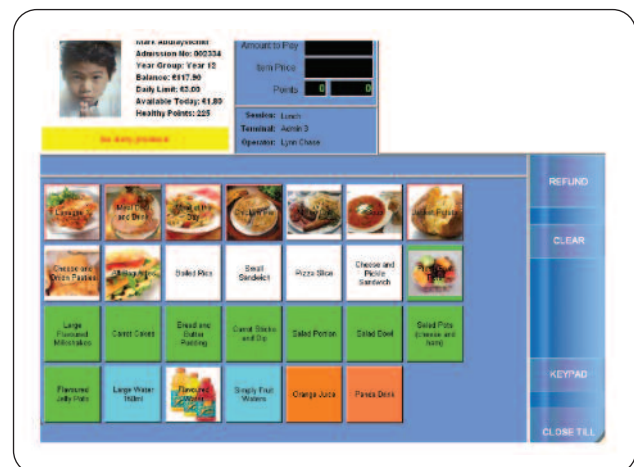

- **One canteen payment method with no stigma attached.**

20 per cent of children who are entitled to Free School Meals (FSM) in the UK do not take them because of the associated stigma and fear of bullying. **VeriCool's** fingertip payment removes this stigma by ensuring that no-one can identify who does, or does not, have an FSM entitlement.

- **Fingertip coin and note loader.**

Along with the standard payment methods of cheque, direct debit and Parent Pay used to load an account, students can place their enrolled finger on the scanner mounted on the coin or note loader, insert the coins or notes for that day, week or term and their account is immediately loaded. This also enables them to check their balance.

VeriCool... first impressions count.

Reducing the administration burden

We have designed our software to be both intuitive and easy to use. Whether in the canteen or the finance office, every aspect of our software is designed to help you and your staff get the most from our software in the easiest way possible.

NO more swipe cards

They get lost, stolen, damaged and borrowed. Issuing new replacement cards can be an unnecessary burden on the resource of the administration department. With our Fingertip Cashless Catering System, as soon as a child is enrolled and money has been credited to their account, they can make purchases.

New features

VeriCool Portal – a new feature of the **VeriCool** Cashless catering Module, allowing students to access account information from any school networked PC 'no need for queuing at the Coin and Note loader or an expensive balance checking device' just click on the **VeriCool** icon to view their individual balance.

Nutritional standard 2009 – **VeriCool** is pleased to announce its partnership with Saffron, HPORT and Relish nutritional analysis software providers, enabling the **VeriCool** Cashless Catering software to aid schools in reporting on the nutritional data of items sold so as to determine whether students are receiving a healthy balanced diet.

Outstanding results...

"The *VeriCool* team has listened to what the school wants from the system and has worked with the catering staff during service to ensure complete confidence in the technology"

"The *VeriCool* cashless catering system has increased our canteen sales by 25 per cent compared to last years figures"

VeriCool for schools... the market leading Biometric multi lesson registration, cashless catering and school reception software provider.
